Press Release

FFAST ANNOUNCES AGREEMENT WITH SABRE

A Progressive Strategic Partnership

A strategic move to bring best in class safety services in the oil & gas sector, KSA

READ MORE AT: WWW.FAJERFAST.COM

Sabre Safety Services Ltd, (a member of the Starn Group) a global business company registered in the UK and operating from Scottish HQ has entered a collaboration with **Fajer Fire and Safety Technologies (FFAST)**, a Saudi National Company operating in integrated fire and safety services business in KSA and Bahrain.

FFAST, a Saudi National Company operating an integrated fire and safety services business in KSA and Bahrain is a division of a large well known medical services group (Fajer Medical Services) and with a distinguished history dating back 30 years. The FFAST business division was established with a vision of compliance to In-Kingdom value addition, focusing on local production and manufacturing of safety products and services by partnering with reliable well known International safety equipment manufacturers and service providers to contribute to growth of Saudi Arabian economy.

Sabre Safety provides H2S services on the global stage with significant project experience stretching from the Americas, UK & Europe, the Middle East and Australasia. Sabre Safety Services has partnered with FFAST to increase its presence inside Saudi Arabia to cover the world's largest oil and gas industry market.

Director of Business Development John Palmer commented “This is an exciting opportunity for Sabre Safety to work with FFAST in the Saudi Arabian market and where we can partner to maximize the competencies of both companies”

The companies have joined forces to provide H2S safety services and other integrated fire and safety services to regional clients in Saudi Arabia. Sabre Safety and FFAST have industry knowledge, qualified and experienced safety personnel, and technical resources to deliver customized H2S and other safety services to the clients in Saudi Arabia. The technical field personnel are factory trained by leading and globally recognized equipment manufacturing companies, whose products are already operational and with a proven work history with the global blue-chip oil and gas companies.

Talking about the new move, FFAST President and CEO, Saleh Al Hathal, commented, “FFAST and Sabre partnership is a true reflection of our commitment to bring world class innovative technologies to Kingdom of Saudi Arabia and transform the industry with localized content to bring added value to our customers alongside directly and indirectly supporting to the Saudi vision 2030 initiative.”

We are certain that this agreement will strengthen the future prospects of both the companies and bring together best in class services for our clients in the Saudi Arabia.
